

IBF Portal

IBF Portal:

The Impact-Based Forecasting (IBF) Portal is a digital one-stop-shop of information which supports the decision-making of disaster managers during anticipatory action operations.

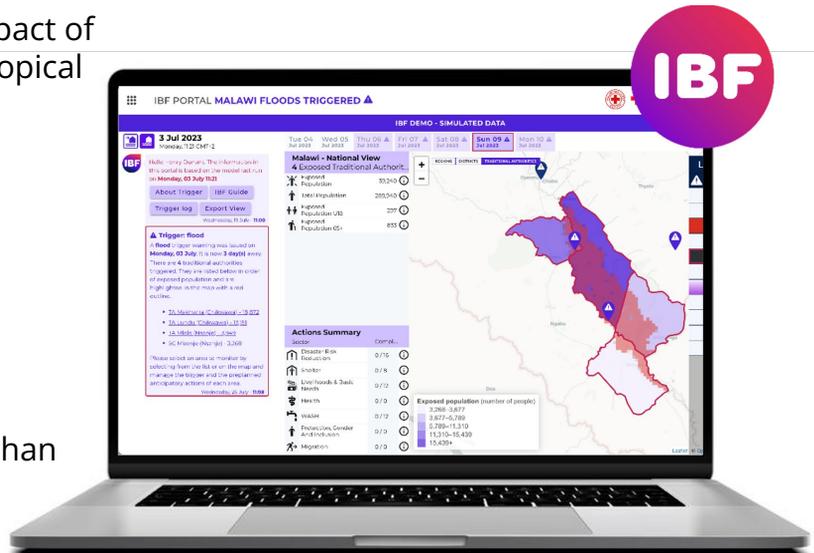

www.510.global/IBF

“Anticipatory action is increasingly recognized as a key solution to reduce the impacts of climate change and extreme weather events.”

IFRC Operational Framework for Anticipatory Action 2021-2025

- ✓ Displays information on the impact of an incoming disaster such as tropical cyclones, floods and droughts
- ✓ Uses evidence-based trigger models
- ✓ Allows decisionmakers to act and execute pre-agreed early actions.
- ✓ Built upon insights from more than 160 co-design sessions
- ✓ Implemented in more than 10 countries in Africa & Asia
