

LRT

Landscape Restoration Tool:

The Landscape Restoration Tool (LRT) allows for an easy comparison of satellite images of the same region from two moments in time.

'IFRC & WWF call for global action to protect nature, to save lives, and address climate crisis'

Working With Nature to Protect People 2022

- ✓ Easy comparison between two satellite images of the same region
- ✓ Helps identify zones that should be prioritized in the response
- ✓ Helps identify zones where the reforestation success rate may be higher
